

TYLER BECK

Software Engineer

I'm a full-stack developer who is highly flexible, an established learner, and continuously expanding my knowledge to maintain current and upcoming coding best practices to maximize performance and quality. I am looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100Devs, Los Angeles, CA

October 2021 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Feliz Travels (React, CSS3) – Travel journal showing off beautiful locations to visit using React, with use of components, props, local API integration, which can be easily adapted to use with database/RESTful API retrieval.

Overlord Memes (React, CSS3) – User clicks button to fetch a random meme using a fetch to a RESTful API, manipulates meme on DOM, with user being able to add text for personalization. Built using React, including hooks and state management.

LUX Real Estate (HTML5, CSS3, Javascript) – Landing Page for LUX real estate company using Javascript for automatic picture carousel and automatic counters for UI aesthetics and customer attraction.

Healing Physical Therapy (HTML5, CSS3, Javascript) – Responsive Website made for a private owned physical therapy clinic who is looking to provide the best quality care!

Other Projects: Stargazer: beautiful pictures of the universe with NASA API integration. Bookworm: a web app allowing users to add/delete books with LocalStorage integration, and others...

Freelance Full Stack Web Developer | USA

January 2022 — Present

Created full stack web applications and static websites for different clients across small and medium size businesses. Also, consulted on best SEO and social media strategy.
